ANDRIYANTO

A

Data Scientist & Analytics Engineer

Email: yandri918@gmail.com **Phone:** +81 8076-988-509 **LinkedIn:** linkedin.com/in/andriyanto-na

GitHub: github.com/yandri918 **Portfolio:** porto-terbaru-ob28ui3cx-andriyantos-projects.vercel.app

PROFESSIONAL SUMMARY

Data Scientist and Analytics Engineer with dual degrees in Computer Engineering (BScE) and Economics (S.E). Specialized in transforming complex data into actionable business insights through advanced analytics, machine learning, and interactive visualizations. Proven track record of deploying production-ready analytics applications that drive measurable business impact.

PROFESSIONAL EXPERIENCE

Data Science Projects Portfolio

2020 - Present

Independent Consultant & Developer

- **Marketing Analytics Platform:** Developed comprehensive marketing analysis tools with customer segmentation and campaign optimization. Achieved 40% improvement in campaign effectiveness.
- **Weather Prediction System:** Built ML-powered weather forecasting with 85% accuracy for agricultural applications using real-time APIs and historical data.
- **Mining Operations Analytics:** Created specialized platform for production tracking and geospatial analysis. Improved operational efficiency by 30%.
- **Economic Analysis Platform:** Developed interactive supply-demand modeling tools used by 500+ students and professionals.
- **Advanced Data Analysis Suite:** Built comprehensive platform with statistical modeling and automated reporting capabilities.

EDUCATION

Bachelor of Science in Computer Engineering (BScE)

Focus: Data Science, Machine Learning, Software Engineering

Bachelor of Science in Economics (S.E)

Focus: Econometrics, Market Analysis, Business Strategy

CORE COMPETENCIES

- Machine Learning & AI
- Data Analysis & Statistical Modeling
- Interactive Visualization & Dashboards
- Economic & Market Analysis
- Full-Stack Development & Cloud Deployment
- Business Intelligence & Predictive Analytics

TECHNICAL SKILLS

Programming
Python, JavaScript, SQL, R

ML/AI
TensorFlow, Scikit-learn, PyTorch

Data Tools
Pandas, NumPy, Matplotlib, Plotly

Web Frameworks
Streamlit, HTML/CSS, React

Cloud & DevOps
Vercel, Heroku, AWS, Git

Database
PostgreSQL, MongoDB

KEY ACHIEVEMENTS

- **5+** Production-ready analytics applications deployed
- **50%** Improvement in decision-making efficiency via automated dashboards
- **30%** Reduction in analysis time with streamlined workflows
- **1K+** Users across multiple industries using built tools

Available for freelance projects and full-time opportunities in Data Science, Analytics Engineering, and Machine Learning roles.
